

Media Pointer

2.4GHz professional presenter with time management

Make a perfect presentation

Are you always stay in front of the PC or can't control the time when you are giving a presentation? Now the latest presenter from Genius – *Media Pointer*, can solve your problems and help you make a professional presentation.

Media Pointer features 2.4GHz wireless technology, time management and media mode functions. It works within a 15-meter range and the anti-interference function lets you move around an auditorium with confidence while presenting. With *Media Pointer*, you will have good interaction with your audience instead of only staring at the monitor.

A built-in LCD timer with a beep alerts you when 30 seconds are left and when the time is up. With this helpful function, you can manage your time easily. In addition, the LCD also shows battery life.

Media Pointer has presentation and media modes. "Laser Pointer", "Volume up/down", "Next/Previous track", "Fast backward/forward", "Play/Pause", "Page up/down", "ESC", and "F5" are all in your hand to control.

Using a good tool is the beginning of success. Let *Media Pointer* bring you the convenience and efficiency for a great presentation. Please contact your sales representative for further information.

The LCD shows time-counting-down and battery life

The receiver can be stored inside the *Media Pointer* for easy storage.
